

# NYSE

**IA Summit  
October 2023**

# How we got here

Market Performance 2013 - 2022FY

## Pre-2021 Investor Themes

- Focus on risk/leverage
- Open window across all forms of ECM
  - IPOs
  - FOs
  - Equity-linked
  - PIPEs
  - Private Placements
  - SPACs

IPO Issuance 2013FY - 2022FY

## Post-2021 Investor Themes

- Focus on visibility of earnings/FCF vs growth
- Downside protection
- Premium placed on cash flow, profitability and growth at scale

# Where we are

## Monthly Issuance Count (2023 YTD)

## Monthly Issuance Proceeds (2023 YTD)

## IPO Sector Issuance Count (2023 YTD)

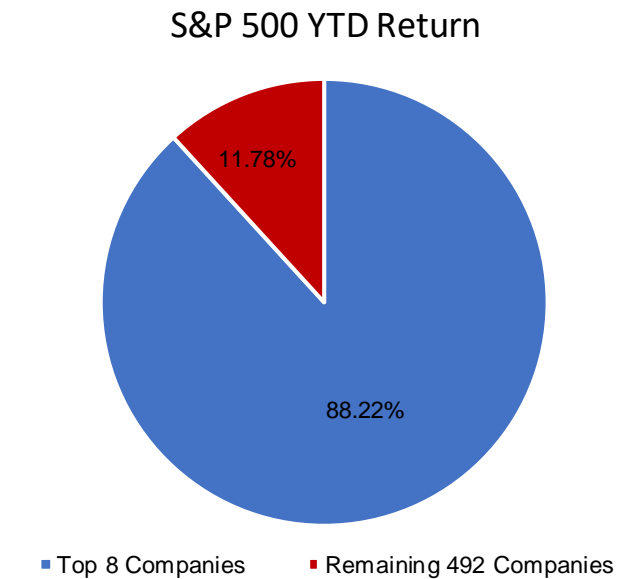

## IPO Sector Issuance Proceeds (2023 YTD)

# Artificial Intelligence within Public equities

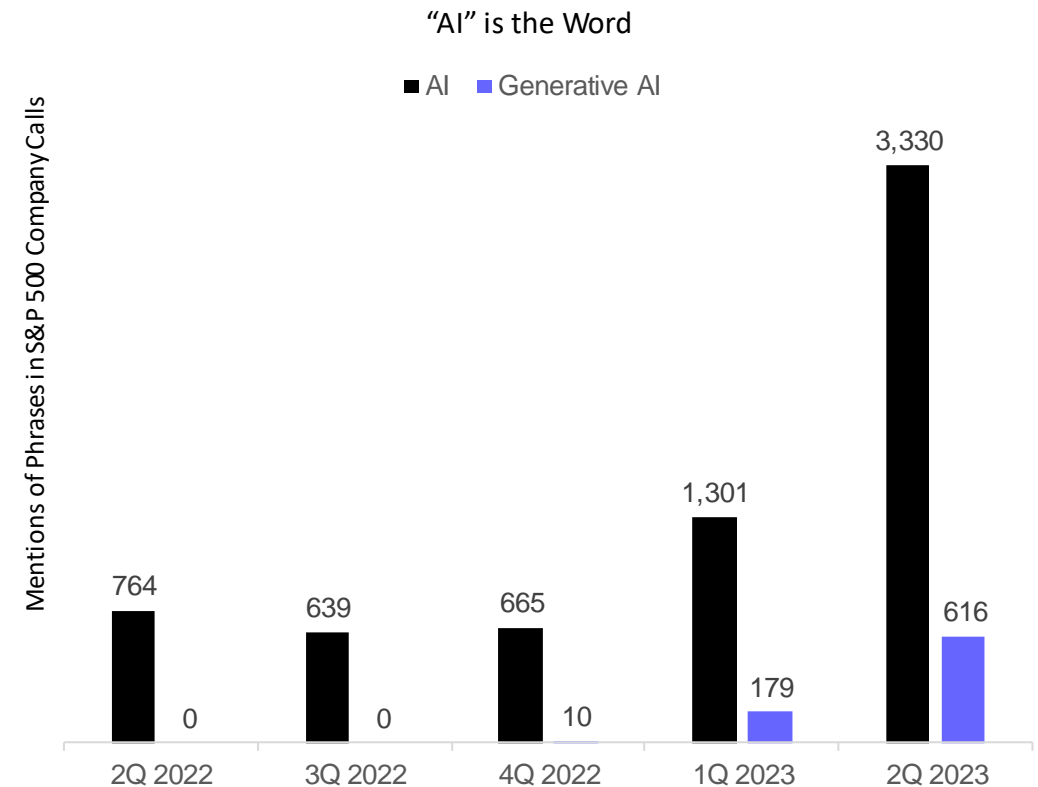

Everything everywhere all at once

Small subset of AI companies have represented outsized investor returns

↗ The top 8 companies of the S&P 500 contribute 88% of the YTD returns

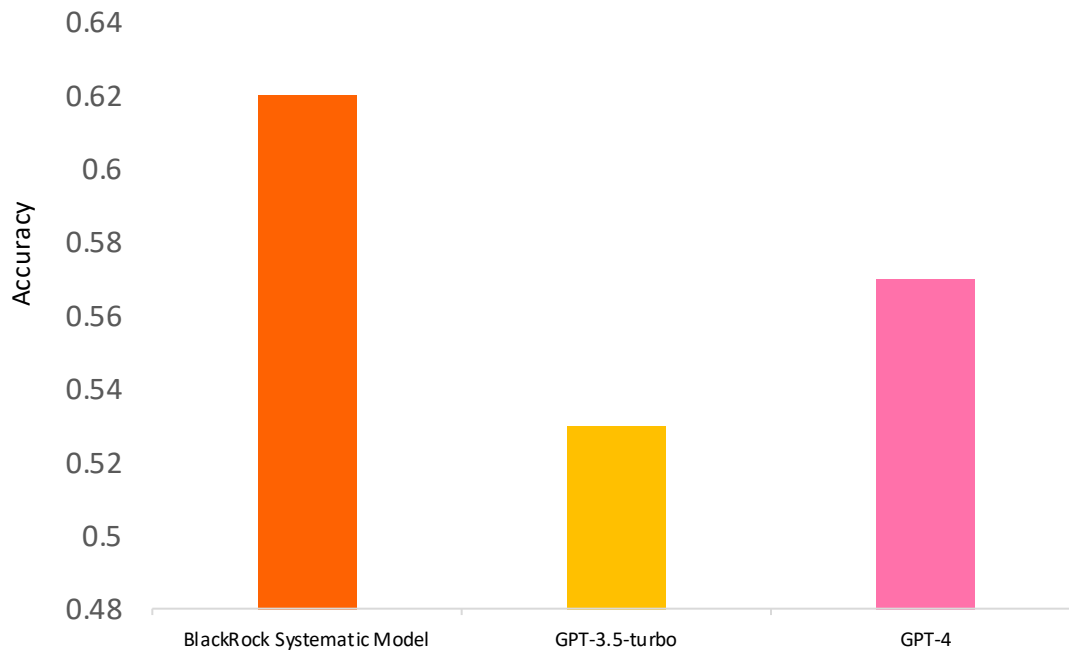

Issuers Earnings announcements including references to AI

# Ongoing impact of AI within the Asset Management industry

## Traditional asset management

Accuracy of models at predicting post-earnings market reactions

Source: BlackRock Systematic, as of May 2023. This analysis is based on a sample of 200 earnings calls. The analysis computes the prediction for each model and compares it with return outcomes (positive or negative) based on future 3-day stock returns. The accuracy is computed as the fraction of predictions that were correct for each model.

## ➤ Hedge fund Usage

- In 2017, 9% of hedge fund managers utilized AI tools to achieve portfolio returns
  - Source: Preqin
- In 2023, it is expected to be >90%
  - Source: Hedge Week

## ➤ Private Equity

- Large alternative managers uniquely challenged in managing big data
  - Challenges with size (i.e., small to large data sets) vs. structured data (traditional vs. alternative)
  - Challenges with the “Big 4Vs”
    - Volume
    - Variety
    - Velocity
    - Veracity

# The road ahead

## ➤ Macro Issues

- Broader secondary market
- VIX
- Impact of rate environment
- Inflation

## ➤ Deal execution Issues

- Smaller windows of issuance activity
- Emphasis on execution strategy
- After-market performance

## ➤ Investor Issues

- Growth vs profitability
- Valuation
